EDUCATION

Teerthanker Mahaveer University, Moradabad

Aug 2022 - Jun 2025

B.C.A. - Computer Applications

Siddhant raj inter college

12th | UP Board

Jul 2020 - Apr 2021

PROJECTS

Movie Blaze (Tech Stack : Javascript, React, MongoDB, Next Js, RestApis)

[\(Live Link\)](#)

- User-friendly web application for searching and viewing movie details.
- Displays essential information such as ratings, critic reviews, and summaries.
- Aggregates real-time data from external movie databases for reliable information.
- Simplifies the movie discovery process for users.
- Developed using HTML, CSS, and JavaScript.
- Focuses on delivering a lightweight and responsive user experience.

Weather App (Tech Stack : Javascript, React, MongoDB, Next Js, RestApis)

[\(Live Link\)](#)

- Developed a responsive web application to search real-time weather information by city name.
- Utilized HTML, CSS, and JavaScript for building the frontend and fetching data from WeatherAPI.
- Displays city name, local time, and temperature with error handling for invalid city names.
- Implemented a user-friendly interface with modern design elements.
- Deployed with best practices for accessibility and responsiveness.

ACHIEVEMENTS

Participant, Rajasthan IT Hackathon – Competed in a state-level hackathon, collaborating with a team to build a voice assistant using speech-to-text technology, demonstrating innovative problem-solving and technical skills.

Smart India Hackathon (SIH) - Internal College Level – Developed an innovative solution that addressed a real-world problem, leading the team to secure the runner-up position in the college-level round of this prestigious competition.
